What is the V-25?

The V-25 is a 25kg capacity vet scale which is ideal for weighing cats and small dogs. The scale is ideal for use in veterinary surgery or at home.

Accurate pet readings can help determine whether an animal needs more exercise or a change in diet, which is why it is so important to closely monitor the weight of your furry friend.

Easy to clean

In order to help make the V-25 incredibly diverse and suitable for veterinary surgeries, we have designed the product to be wiped down.

Even though the device does not hold an IP rating, the platter can be wiped down without causing damage to the scale. Making it a clean and hygienic addition to any surgery.

Lightweight and portable

The V-25 has been designed with the ease of the user in mind. Whether it be within a veterinary surgery or at home, this is the ideal scale.

Weighing only 1.8kg, the scale is easy to transport around the veterinary surgery, from room to room. Or when used at home it is slimline enough to be stored in small and compact spaces.
